NFL Draft Storyboard

Create a list of players eligible for NFL Draft for current season consisting of player details.

Individual player can be viewed to get Player Stats by clicking player name.

Draft List can be searched and sorted for players based on all player details.

Scheduled time and date for NFL draft provided for Owners to login.

Owner can select players to draft by clicking radio button and adding them to their list.

Final review by owner before completing draft by reviewing list. Can remove players and add new.

Player Details: Name, Position, College, Age, Height, Weight, Yrs Experience

Player Class: Player stats for all positions included in player class. Only those specific to the player position populate on view when selected

Player List: Includes ability to sort by selecting a specific criteria (Position, College, etc.). Or perform a keyword Search

Draft App: Owner Logins into NFL Draft and provided a list of all available Players details

Manager Class: Adds selected players the owner selects to team manager list.

Final Draft: Manager can remove a player by unchecking radio button and select new players before hitting the Final Draft Button
